Program:

The Regional Chess Tournament is open to students in grades K-12 who have had prior chess playing experience. This event is an opportunity to improve analytical thinking skills while having fun competing with students from other districts. Numerous studies indicate that children who play chess regularly see improvements in reading and math scores. Chess teaches critical thinking and problem solving.

There will be rated and non-rated sections divided by grade level. Students will be guaranteed at least four match games. Medals and certificates will be awarded.

All students must be accompanied by an adult
