### FUNCTIONAL ASSESSMENT INTERVIEW FORM-YOUNG CHILD

Child v	vith Problem Behavior(s):	Date of Interview:							
Age: _	Yrs	Mos	Sex:	M	F				
Intervie	ewer:	Responde	nt(s):						
		~~~~~							
	A. <u>DES</u>	CRIBE THE B	EHAVIOR(S	<u>S)</u>					
1.	What are the behaviors of concern day, wee, or month, how long it last medium, high).								
<u>Be</u>	havior How is it perform	ed? Ho	w often?	How lo	ng?	Intensity?			
1.									
2.									
3.									
4.									
5.									
6.									
2.	Which of the behaviors described a predictable "chain"; occur in respo			at the san	ne time; c	occur in a			
	B. <u>DEFINE POTENTIAL EC</u>	OLOGICAL E BEHAVIO		AT MAY	AFFE	CT THE			
1.	What <i>medications</i> does the child ta			e may affe	ect his/he	r behavior?			
2.	What medical complication (if any (e.g., asthma, allergies, rashes, sing			nay affect	his/her b	ehavior			
3.	Describe the <i>sleep cycles</i> of the chebehavior.	ild and the extent to	o which these	cycles ma	y affect l	nis/her			
4.	Describe the <i>eating routines and d</i> his/her behavior.	iet of the child and	the extent to v	which the	se routine	s may affec			

5. Briefly list the child's typical daily schedule of activities and how well he/she does within each activity.

#### **DAILY ACTIVITIES**

Activity	Child's Reaction
6:00am	
7:00am	
8:00am	
9:00am	
10:00am	
11:00am	
12:00am	
1:00pm	
2:00pm	
3:00pm	
4:00pm	
6:00pm	
7:00pm	
8:00pm	
9:00pm	

6. Describe the extent to which you believe activities that occur during the day are *predictable* for your child. To what extent does the child know what he/she will be doing and what will occur during the day (e.g., when to get up, when to eat breakfast, when to play outside)? How does your child know this?

7. What choices does the child get to make each day (e.g., food, toys, activities?)

# C. DEFINE EVENTS AND SITUATIONS THAT PREDICT OCCURRENCES OF $\underline{\text{THE BEHAVIOR(S)}}$

1.	<u>Time of Day:</u> When are the behaviors most and least likely to happen?
	Most likely:
	Least likely:
2.	Settings: Where are the behaviors most and least likely to happen?
	Most likely:
	Least likely:
3.	Social Control: With whom are the behaviors most and least likely to happen?
	Most likely:
	Least likely:
4.	Activity: What activities are most and least likely to produce the behaviors?
	Most likely:
	Least likely:

5. Are there particular situations, events, etc. that are not listed above that "set off" the behaviors that cause concern (particular demands, interruptions, transitions, delays, being ignored, etc)?
6. What one thing could you do that would most likely make the problem behavior occur?
7. What one thing could you do to make sure the problem behavior did not occur?
D. DESCRIBE THE CHILD'S PLAY ABILITIES AND DIFFICULTIES
1. Describe how your child plays (with what? how often?).
2. Does your child have problem behavior when playing? Describe.
3. Does your child play alone? What does he/she do?
4. Does your child play with adults? What toys or games?
5. Does your child play with other children his/her age? What toys or games?
6. How does your child react if you join in a play activity with him/her?
7. How does your child react if you stop playing with him/her?
8. How does your child react if you ask him/her to stop playing with a toy and switch to a different toy?

#### E. THE "FUNCTION" OF THE UNDESIRABLE BEHAVIOR(S)

1. Think of each of the behaviors listed in Section A, and define the function(s) you believe serves for the child (i.e., what does he/she *get* and/or *avoid* by doing the behavior?)

Behavior	What does he/she get? Or	What exactly does he/she avoid?	
1			-
2			-
3			-
4			-
5			-
6			-
7			-
8			-
9			_
10			-
	he child's most typical response to the	·	
a.	Are the above behavior(s) more likely	y, less likely, or unaffected if you pr	esent him/her

- with a difficult task?
- b. Are the above behavior(s) more likely, less likely, or unaffected if you interrupt a desired event (eating ice cream, watching a video)?
- Are the above behavior(s) more likely, less likely, or unaffected if you deliver a "stern" request/command/reprimand?
- d. Are the above behavior(s) more likely, less likely, or unaffected if you are present but do not interact with (ignore) the child for 15 minutes.
- e. Are the above behavior(s) more likely, less likely, or unaffected by changes in routine?
- Are the above behavior(s) more likely, less likely, of unaffected if something the child wants is present but he/she can't get it (i.e., a desired toy that is visible but out of reach)?

g. Are the above behavior(s) more likely, less likely, or unaffected if he/she is alone (no one else is present)?

F.	<b>DEFINE</b> 7	THE EFF	<b>ICIENCY</b>	OF THE	UNDERSIRA	ABLE BEH	IAVIOR(S)

1.	What amount of physical effort is involved in the behaviors (e.g., prolonged intense tantrums vs. simple verbal outbursts, etc.)?
2.	Does engaging in the behaviors result in a "payoff" (getting attention, avoiding work) every time? Almost every time? Once in a while?
3.	How much of a delay is there between the time the child engages in the behavior and gets the "payoff"? Is it immediate, a few seconds, longer?
	G. DEFINE THE PRIMARY METHOD(S) USED BY THE CHILD TO COMMUNICATE
1.	What are the general expressive communication strategies used by or available to the child? (e.g., vocal speech, signs, gestures, communication books/boards, electronic devices, etc.) How consistently are the strategies used?
2.	If you child is trying to tell you something or show you something and you don't understand, what will your child do? (repeat the action or vocalization? Modify the action or vocalization?)
3.	Tell me how your child expresses the following:

# **MEANS**

	GRAB & REACH	GIVE	POINT	LEAD	GAZE SHIFT	MOVE TO YOU	MOVE AWAY FROM YOU	HEAD NOD/HEAD SHAKE	FACIAL EXPRESSION	VOCALIZE	IMMEDIATE ECHO	DELAYED ECHO	CREATIVE SINGLE WORD	CREATIVE MULTI WORD	SIMPLE SIGNS	COMPLEX SIGNS	SELF-INJURY	AGGRESSION	TANTRUM	CRY OR WHINE	OTHER	NONE
<u>FUNCTIONS</u>																						
Requests an Object																						
Requests an Action																						
Protests or Escapes																						
Requests Help																						
Requests a Special Routine																						
Requests Comfort																						
Indicates Illness																						
Shows you something																						

**NOTES:** 

4.	With regard to receptive communication ability:
a.	Does the child follow verbal requests or instructions? If so, approximately how many? (List, if only a few).
b.	Is the child able to imitate someone demonstrating how to do a task or play with a toy?
c.	Does the child respond to sign language or gestures? If so, approximately how many? (List, if only a few.)
d.	How does the child tell you "yes" or "no" (if asked whether he/she wants to do something, go somewhere, etc.)?
н.	WHAT EVENTS, ACTIONS, AND OBJECTS ARE SUPPORTIVE OR PRESENT CHALLENGES TO THE CHILD
1.	Describe the things that your child relly enjoys. For example, what makes him/her happy? What might someone do or provide that makes your child happy?
2.	What kinds of things have you or your child's care providers done to try and change the problem behaviors?

## I. DEVELOP SUMMARY STATEMENTS FOR EACH MAJOR PREDICTOR AND/OR CONSEQUENCE

Distant Setting Event	Triggers	Problem	Maintaining	Function
