Phoneme Segmenting

Objective: To increase skill in phoneme segmenting for students who
• Have not yet mastered this skill

Materials: List of words for segmenting

Sequence:

1. Interventionist sits opposite the student
2. **Explain:** Interventionist says to the student “Today you’re going to practice saying the sounds in words. I’ll say a word. Each time I hold up a finger, you’ll say a sound in that word.” This explanation may be shortened for students who have experience with this intervention, but some explanation must be given at the start of every session.
3. **Model:** Interventionist says to the student “I’ll model for you how to say the sounds in two words. I’ll say a sound each time I hold up a finger. My turn.” Interventionist models for the students, using the signaling procedure described above with only the Interventionist responding. Interventionist is certain to hold up fingers in left to right order for the student’s perspective. An adult model is to be provided at the start of every session, even if the student is familiar with the expectations of the task.
4. **Practice:** Interventionist says to the student “I’ll say a word. Each time I hold up a finger, you say a sound in that word. Your turn.” Interventionist practices with student. Interventionist maintains brisk pace, with little pause between words.
5. **Correction:** Any time a student responds incorrectly, the Interventionist immediately says “My turn,” demonstrates the correct response, then says “Your turn” has the student respond to the same word, backs up 2 words and continues forward so that the word identified incorrectly comes back up again. (i.e., “My turn. Tag /t/ /a/ /g/. Your turn. Tag”

What If I Don’t See Progress?

1. Work on only two phoneme words or words with only continuous letter sounds until immediate mastery is noted on these
2. Provide a model for more words
3. Be certain that error correction procedures being delivered correctly
